

The small **BIG** difference.

DIN EN 13967 **DIN EN 13252**

Euro standards are booming. But be careful! Often the only small (big) difference lies in the number combination. For waterproofing and drainage sheets there are currently two different DIN standards that apply:

DIN EN 13967

**Products with
DIN EN 13967 are only approved
for waterproofing.**

WATERPROOFING

DIN EN 13252

**DIN EN 13252 certification
in contrast
guarantees perfect drainage.**

DRAINAGE

The following Dimpled Sheets from Interplast Kunststoffe GmbH all fulfil DIN EN 13252 (filter, separate and drain):

ISO-DRAIN 8 GEO

ISO-DRAIN 8 GEO PLUS

ISO-DRAIN 10 GEO

ISO-DRAIN 10 GEO PLUS

Proper drainage is therefore only possible with 13252!
